Course Title: **Tech 21st Century Classroom**

Surveyed (i.e. enrolled): **17**
Completed an evaluation: **17**
Completion rate: **100%**

Comments
Great class, I would take again!
Brother Pacini is a wonderful innovative teacher and always looking to improve. He loves his students and has high expectations.
He was such a fun teacher and I would take any class he taught if it was related to my major.
I loved this class and loved learning so many other foundational skills on top of learning about technology! I would say this is probably my favorite class I have taken at BYUI so far!
I would lower the percentage of the projects as a grade and lift the attendance and make that a bigger part of the grade
This class provided me with insight I didn't know I needed to learn. It helped me develop a mindset of skepticism while also letting me think for myself.
I absolutely loved this class! I was a lot of work but I am in love with everything I learned.
This was the most amazing class I have ever taken. I felt like I learned so much and I 100% believe it is because of yhe professor because quality teachers can make a class great.
Bro Pa is the best teacher I have had here. He challenges the class but does it in such a way that it is not overwhelming. I feel supported and willing to go to him for questions, even if they are not about the class. It was a very fun class and I felt very welcome every day.
