Subject: Fall C3 for Education Core

Hello,

The Education Core courses are scheduled to participate in a C3 lab in the Fall 2023 semester. We will be taking all courses through to look at them from a program perspective to evaluate the alignment between them. This is a new foray for the C3 group as they have not done a program look in this way before. After this experience, we hope each of the core classes can then be taken through the C3 lab for an in-depth review and update individually. You are receiving this email because you are a course lead for one of the core courses. I would like to have been able to get us together to chat, but my schedule is pretty booked next week, and we want to solidify the members of the team soon so accommodations for PDL can be made for participants.

We will need representatives for each course that have taught the course and know it well. It could be that one faculty member could represent several courses if they have taught a few of them. We are trying to keep the numbers small so that the group can be effective and not too big. **Please send your thoughts for the person that could represent your course (it could be you).** We will also need to invite 2ish faculty from outside of the teacher preparation programs. These people will be able to offer outside points of view. **If you have ideas or recommendations for these outside people, please let me know.**

Thanks,
Melissa
