Course Title: **Tech 21st Century Classroom**

Surveyed (i.e. enrolled): **39**

Completed an evaluation: **29**

Completion rate: **74%**

Comments

Love this class!!
I enjoyed this class way more than I thought I would. The lessons were helpful and useful. I liked the sense of community I felt in the classroom as we met.
I had a lot of fun in class. I particularly enjoyed the memes, spiritual moments, and class discussions. I also really liked the side helps for things like job applications and interviews. Although I enjoyed the weekly readings, I felt the time requirement was a little too high. I think everything could stay the same but the time requirement. I felt it was too long. I also would have liked to study our lessons more in depth rather than spend 10-15 minutes on technical stuff (like what we did at the beginning of every class).
Thank you BroPa!
This course was very challenging, but also very rewarding.
BroPa is understanding and very kind!
awesome teacher. Great class.
This was an exceptional course, but the reason I loved it so much was that BroPa actually cares about the student experience and feedback. The class wasn't difficult for the sake of being difficult, but because he genuinely believed that we could achieve the level of understanding and mastery he expected. I'm eternally grateful for the opportunity I had to take a class from him and I would do it again in a heartbeat.
I loved this class! Keep the memes!!
Bro Pa has seriously become one of my favorite teachers and this has become one of my favorite classes! The class is fun and informational. I learned a lot about educational technology tools and how we can use technology for our future classrooms. I loved how helpful Bro Pa and the TA were. I did wish some of the projects were better explained at times but I eventually understood after getting help and looking at examples. This course was fun and definitely hard work, but in the end I am so happy I took it and proud of myself for pushing through.
