Instructor: **Pacini, Benjamin**
Course Name: **ED 211 (03)**
Course Title: **Tech 21st Century Classroom**

Surveyed (i.e. enrolled): **35**
Completed an evaluation: **34**
Completion rate: **97%**

Comments

It is for my 4-6th extension
Bro Pa was great. My only thing is, he never took a chance to get to know me or my name. The last week of school after seeing him twice a week, he never knew my name.
Brother Pacini is a fantastic person and I?m so glad I was able to meet him and be in his class
None
I would recommend him to anyone!
Brother Pacini did a phenomenal job teaching this class. I was inspired every time I left his class. He showed us how we can be better educators everytime we stepped into his class. He did a great job at teaching us new techniques using technology and incorporating it into projects so we could expound on the topics we touched in class. If I could change anything, I would change the oral exams because they felt rushed and the questions were very simple so I feel like I didn't benefit very much from them. Maybe there could be different criteria for the questions or instead of an oral exam, we do ticket out the door. Other than that, the class was life changing. I questioned things I used to believe and have a changed but better perspective.
-
I learned more in this class than most classes I have taken. Brother Pacini was always genuine and cared for his students. He asked a lot of questions that were very thought provoking and helped me form my opinions for my own teaching pedagogy.
PENGUIN!
This class was difficult at times and even stressful as I was getting used to how the class functions. However, I think that even though it was difficult at times, the course is set up really well and pretty much all of the assignment and projects that we worked on were valuable and useful to me and my career as an elementary ed major. There was a lot of work and effort but also a ton of learning and I really liked that! I liked building my portfolio and seeing progress. I also learned so much from Brother Pacini, not only about teaching, but about life and the gospel. He answered questions that I had about life and helped me to build up and put into words the things that I believe. The class was always super fun, meaningful, and has changed my outlook on many things, as well as it has taught me so much about being a teacher and the different useful technology that is out there and how I can use it. I learned and thought about so much in this class.
This class has been awesome. I have learned so much about what I believe in for education and for life in general. Sometimes the weekly project instructions were a little confusing, but other than that I really liked this class.
.

Brother Pacini is by far the absolute best professor i have had in the 3 years i have been here. Not only does he improve my spirituality, but has taught me what the real world will look like. How to prepare. How I can be the ray of light in the darkest ally. Teaching is not always rainbows and bunnies. which is unfortunally is the picture all of my previous teachers have painted. Bro Pa has taught me there can bunnies and rainbows, but that takes extremely hard work, blood, and tears. His one semester-2 credit class has prepared me for teaching than all my 3 years of education classes smushed together.
I wish we had spent more time preparing for the google certification.
This Professor changed my life, and this class was really awesome. I learned a ton!
No
I wish we had spent more time preparing for the google certification.
This professor is amazing yes there is a lot of work but the work is valuable and can help for the future.
I am grateful for this class. I have learned what it means to be a really great teacher. Brother Pacini taught not only the content, but so much more that will stick with me for the rest of my life.
Brother Pacini inspires me to be a better person.
