GREAT teacher that works with you
A lot of course work, tough and demanding
Change this course to 3 credits
Disorganized and confusing at times

It was extremely difficult to get into contact with the professor for a lot of the semester. I wish we had clearer instruction of assignments and projects even though he claims he meant to not give us clear instruction so we could figure it out on our own

Amazing teacher!! Very passionate and enthusiastic about teaching which is vital to future teachers. Is always willing and able to help out in any way possible.

Brother Pacini is an excellent professor who is kind but also enforces great rigor into his class. The organization could have been improved, but far from outweighed the value of this course.

This was your first semester, so I'll give you some slack. Just try to be a little more organized next time!

This class was wonderful! It was a project based class and was able to build my portfolio as well! Brother Pacini made the class 10x better though!

N/A

This class was very inspiring in a lot of ways. It helped me feel more prepared for my major and for future classroom. The teacher is very enthusiastic about the course, and the tools we used will be useful for the future. It is an amazing class. I think the hardest part of the class is the technology issues that can arise, but that's to be expected I feel like. It was awesome!

There was no clear explanations on any assignments. I always felt like I never knew what was going on. The teacher seemed unorganized. I tried to be sympathetic because he was moving but it felt like even once he moved he was still all over the place. Due dates constantly changed so I had to turn in some assignments at my own pace because I never knew what was totally accurate. He also gave grades based on humor. It felt like he would randomly give points to people just because they were funny. It seemed like he didn't look at assignments closely or had a consistent way to grade. Also there should not be a dank meme assignment. It would be one thing if it was extra credit. I shouldn't be graded based on my humor.

Brother Pacini is a JOY! He is an incredible educator. His experience has built him into a very rare human being. He has a big heart and a good head on his shoulders. He is young but oh, so very wise! He pushes us, and yet, I feel like his class was easy... and hard at the same time. Perfect!

This instructor was not available almost ever for questions. Once I was able to get ahold of him he said he doesn't give good explanations because he wants students to ask questions. The problem is that he doesn't respond to emails for atleast two weeks so asking questions becomes very difficult.

Brother Pacini was amazing! There was a lot to do in this class, but he gave us chances to fix our mistakes when we needed it and worked with us if we had questions. By being so involved with our progress in this class, I felt confident submitting my assignments without fear of getting degrading feedback. When feedback was given, it was thoughtful and productive. Brother Pacini definitely led this class with high expectations, but high love as well. These attributes really made class enjoyable and felt as though we were an actual class even though we were remote this semester.

Brother Pacini is a very wise hire. He will bring a lot to the teaching department.

Many opportunities for extra credit, easy to get a good grade if you do all you should, enjoyable class, teacher is fun but expects work and learning

This has been one of the best classes I have taken from this University. Brother Pacini is fair and fun to listen to during class. I will use all the tools and knowledge I have been given in this class in my future classroom

Directions and expectations for some of the assignments should be clearer.

BEST PROFESSOR EVERRRR!!!!!!!

I love this class! I love how open I can be and at the same time the teacher accepts our comments.
One thing that I had a hard time with was the organization. It drove my crazy lol. It made me stressed.
