Subject: FW: Candidate Observation of Faculty

Ben,

So great to be in your class yesterday and watch you teach and organize such a positive learning environment. You can click on the link below to get more detail of my write up. One thing I didn't get to put in the observation form (it ended and I didn't realize I couldn't edit it) is one of the best things you do in the classroom – is being genuine, open, honest, and vulnerable. Despite my efforts to be this way, I still don't feel like I am being as vulnerable as I'd like to be, and therefore may not be connecting with the students as personally as I'd like.

I spent 20 years in the field of dietetics, counseling patients, and then transitioned to teach at BYUI. It had always been a possible goal and I always thought teaching would be awesome – and I've not been disappointed. Having said that, I need more help in becoming a better teacher. I have kind of been figuring things out and winging it for the last two years.

Will you please come to my class to observe and give FEEDBACK? I truly want you to give me several points of critique so I can improve! Unfortunately, most people who have observed my class don't give feedback – probably due to not wanting to be offensive – which is understandable.

Also, do you recommend any good books I can read, to help me improve my teaching skills?

Thanks again!

Greg

Here is my teaching schedule this semester:

MWF 12:45-1:45 p.m. – Intro to Nutrition – Room STC 290
T/R 8-930 OR 945-1115 a.m. – Intro to Nutrition – Room STC 201

Candidate Information
Candidate Name Greg Mahrt
Candidate Email *IMPORTANT* mahrtg@byui.edu

Observation Information
Faculty Member Observed: Benjamin Pacini
Class Name: ED 304 Ed Psych & Human Development
Observation Date: 2/2/23

Organization and Preparation: Record any ideas that you plan to implement in your own teaching.
Background music playing which set a nice tone before and during class
Liked how he started class with a question, "Do you have any questions for me?"
Fun Intro about Chat GPT - embracing the technology but realizing it's shortfalls
Lots of enthusiasm and energy displayed - which I need a dose of when I teach
Displayed a relaxed yet confident attitude that I'd like to exude better in my class

Management of the Learning Environment: Record any ideas that you plan to implement in your own t...
Class set up in teams was well organized and team members understood their rolls and were prepared to teach each other in their small groups. I like the fact that the students teach and then quiz the others for understanding. During the second teaching opportunity the others were able to teach and repeat the process. Very well organized and I like the fact that they were prepared to teach and engage with the material. I have participation points in class that they earn from showing up. I want to transition to this idea of teaching one another and grading the other students in their group - for daily participation points (grading yourself and the others grading you). Also, their understanding of the concepts should dramatically improve as they prepare and then present to the others.
Mid way through class - took a break showing funny memes - which kept the class environment light hearted. I want to adopt something similar to have more fun in class.
Ben - at one point told his class to "Freeze" and "All eyes on me" which they actually did. I struggle to maintain control and get the attention back after a group activity - and maybe come across a bit annoyed - which isn't what I want to do.
Having students go to the board and answer questions in their notebook, moving from one topic to

another, was a helpful and engaging/interactive activity. The students learned well and had a good time while doing it. Like the question he posed after, :What did you learn from this experience?"

Incorporation of the Learning Model: Record any ideas that you plan to implement in your own teac...

Students were prepared for class to teach others, displayed teaching one another very effectively, and assessed other's understanding of the concepts in their small groups.
