Completion rate: **97%**

Comments
BroPa is the best.
I have learned more in this class about Elementary Education than almost any other class.
N/A
Good class, good teacher. Learned valuable life lessons while also learning about different EdTech tools
N/A
The class is full of meaningful learning experiences and the professor is outstanding. My only issue with the course is that the professor's desire to challenge his students often turns into more time and less challenge--not necessarily busy work, but very close.
BroPa is great. I know he wants reviews that are more middle ground so he can compare the data but let's face it, if you do the work, you get the grade you want. BroPa is like that in all classes. Just put in effort and he won't let you fail.
BRO PA IS A COOL PROFESSOR
I am really grateful for this class because I actually felt like I was learning and that I wanted to learn! I feel more passionate about my major and the career I am going into. Brother Pacini has inspired me to be innovative and find ways to make the world a little bit better.
This was an amazing class, and I'm really glad I ended up taking it. Some of the projects weren't quite what I was hoping for, but overall I learned a bunch. And I came away with a better understanding of what it's like to be a teacher.
