Amazing Teacher and an amazing class. I love his enthusiasm and temperament. Some of the assignments I didn't agree too much on, but I guess they can be for a changing world that I don't want to be a part of, but know that I need to be.
A great class and an even greater teacher! The class was fun and I learned and grew a lot in the subject.
Brother Pacini keeps class interesting and does a great job in bringing in joy and humor at appropriate times. I also appreciate how he has created a rigorous course but with many opportunities to ask questions and to make sure of understanding. I would definitely take a course from him again!
This class was an exciting class and I learned so much from this class. This class tended to be my hardest class this semester but that hard work paid off in a meaningful way.
The course is difficult, but as long as you ask for help you can pass with even flying colors!
Brother Pacini as an awesome teacher and taught life lessons and things that will help for my future career and not just the content.
BroPa the only thing I really didn't like was the review that we were meant to be writing this whole time. I usually forgot. What I think is a better idea is making the review for the day of the attendance check.

Brother Pacini is the best teacher I've ever had.
