Instructor: **Pacini, Benjamin**
Course Name: **ED 211 (02)**
Course Title: **Tech 21st Century Classroom**

Surveyed (i.e. enrolled): **10**
Completed an evaluation: **10**
Completion rate: **100%**

Comments
I LOVED BRO PA
No
One thing that I would do different is spending more time on being explicit in different areas you can use technology beyond an app. Overall, it was an excellent course and the professor was amazing. i learned so much. I also wish that with weekly readings that we could of put more emphasis on them during class and really debate things.
I appreciated how much content was in this course! I was always wishing for more time so we could cover more of the material. It never felt like there were filler classes.
Before this class I didn't know a lot about the different EdTech applications. I liked having different professors come in once a week to teach us about a new resource we can use in our future classrooms. Overall, the class was a great learning experience. Brother Pacini always did his best to get everyone involved even if not many students participated very often. He makes learning exciting and teaches what it really means to be a teacher.
