I really appreciate the time BroPa and the TA's take to make sure we know what's expected with our assignments. The discussions always leave me pondering something new, and I've used so much of what I've learned in my life and with my family.

I love BroPa!
He will make you work for the high grade you receive. Very rarely will your final grade be a B or lower
Brother Pacini is great, but I'd say this class was hardly about technology. I learned a lot about other religious and education based things, but I could have learned more about technology in the classroom.
BroPa is the best teacher I have had here.
This class is worth taking, even if you aren't an elementary ed major! You learn a great deal about becoming a better person and desciple of Christ. However, if you don't do the work, you will struggle.
Course was intense. So much homework but I loved Brother Pacini
I think everything was wonderful, but something that could be improved upon is clear instruction. There were many times in my group were we looked at each other and said, "what are we suppose to do?" And all of us had even taken notes and read through everything in the project descriptions. I felt like sometimes the descriptions said one thing, the groups presenting each week said another, the TA's would say something else, and then you would be on another different page. So clearer instructions would be very helpful in the future.
Excellent job BroPa! You had great TA's and I felt very included in this class. Thanks for loving what you do. Se contagia el amor que usted tiene a su trabajo y me brinda a ser una futura profesora con las buenas cualidades que usted me a ensenado. Gracias!! -Nahomi Romero
